Customer background

Founded in 2008 by Diners Club Italia with the mission to create a center of excellence in card processing for Diners Club franchises, Dinit was responsible for implementing a major migration project in the region, when Diners Club Italia changed hands in 2008.

Founded in 1950, Diners Club International is a franchised network operating in nearly every country in the world, specific to the travel and entertainment sector with high customer value proposition. Diners Club was the first credit card issued in Italy in 1958. In 2008 Findale Enterprise, a holding company, took ownership of Diners Club Italia.

Business challenge

Dinit was in front of the major challenges:

- reducing operational costs and developing a robust but agile and effective information systems
- establishing a new data center and building a team of experts in the card processing area
- migrating current card and merchant portfolio from Citibank systems to new infrastructure
- creating a value for its clients by delivering modern and easy to use technology solutions.

“Challenge ahead of Dinit was to choose solutions that can be implemented within the deadlines, within the budget and which will provide strong base for the future growth.” explains Primož Patru, CEO of Dinit and Operations Director in Diners Club Italia.

Solution

Dinit has been approached by Vestigo, a Croatian company with experience in banking and card management software industry. Vestigo successfully implemented Card Management System for large bank in Croatia managing more than 3.000.000 cards. «We were very impressed with knowledge of Vestigo consultants, it was clear that they understand card management business» continues Patru. After thorough analysis Dinit decided to base its new Card management platform on Vestigo CMS.

Benefits

The new CMS provides rich functionality and its modern architecture enables easy integration with other key systems. “We strongly feel that we have a platform and partner capable of supporting us in reaching our ambitious future goals” says Patru and finishes with “we already have plans to continue growing the cooperation with Vestigo”.

About Vestigo
